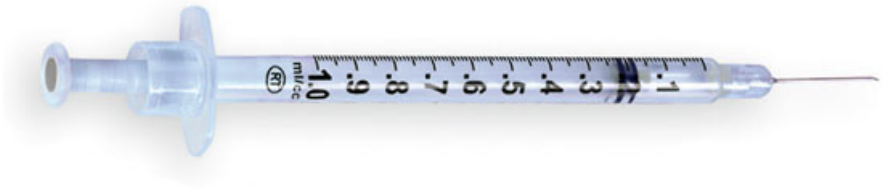
VANISHPOINT® - säkerhetsinjektionsspruta

Lämpar sig vid COVID-19 vaccinationer. Liten restvolym 23µL.



Produktinformation

- Låg rest volym endast 23µL, vilket innebär att man får ex. ut 6 doser av Pfizer/BioNTECH COVID-19 vaccin.
- Komplett sortiment av 0,5ml,1ml, 3ml, 5ml och 10 ml sprutor med kanyl.
- Unik säkerhetsfunktion som minskar risken för stickskador.
- Unik integrerad säkerhetsfunktion som fungerar med enhandsfattning.
- Lätt att använda, ingen förändring av injektionsteknik.
- Engångs.
- Latexfri.
- CE 0086

Handhavandeinstruktion

Anslut nålen till Luer Lock eller Luer slip spruta (upp till 3ml spruta). Gen injektion enligt lokala rutiner

Tryck ner säkerhetsfunktionen som på bilden och nålen åker in automatiskt i nålhållaren.

Släng sprutan i riskavfallsbehållare.

Re: VanishPoint® Syringe Dead Space

To whom it may concern,

- The VanishPoint 1mL syringe has a low dead space, less than 35 microliters, which meets the criteria for accessing 6 doses as described in Pfizer/BioNTech COVID-19 vaccine product information.
- All VanishPoint syringes are manufactured in accordance with international standards (ISO 7886-1) for dead space.
- VanishPoint syringes feature automated needle retraction which effectively reduces the risk of needlestick injuries. As indicated in the Instructions For Use, the activation of the retraction mechanism occurs when the plunger handle is fully depressed. The complete depression of the plunger handle delivers the full medication dose and activates the automated needle retraction directly from the patient.

Please refer to attached documents for additional information, and feel free to contact me at becky.piroga@retractable.com with additional questions.

Sincerely,

Becky Piroga
